HOUSE DECORATIONS.—R. Y. BARNES and CO., Plumbers, Glaziers, Painters, and Paperhangers undertake every description of work, inclusive both of the plainest house painting and also of the most tasteful and costly applications of decorative art, upon an entirely new scale of reform, and are able to render BETTER WORK at SMALLER CHARGES than has ever hitherto been realized. Contracts for general repairs. Estimates free of charge.—37, Windmill-street, Finsbury-square.

NEW SHOW ROOMS for BEDSTEADS.—HEAL and SON have created some extensive Warerooms for the purpose of keeping every description of Bedstead. In them their stock will include every sort manufactured, from the cheap Sacking, for servants' use, to the handsomely ornamented tubular-enlarged Canopy, as well as Iron Bedsteads of every shape and pattern; and in Wooden Bedsteads their rooms are sufficiently extensive to allow them to fit up a variety, both in Polished Birch and Mahogany, of Four-post, Canopy, and French, and also of Japanned Bedsteads—in fact, to keep in stock every part of Bedstead that is made; they have also a general assortment of Furniture, Chintzes, Damasks, and Dimities, so as to render their stock complete for the Furnishing of Bedsteads as well as Bedding. Without attempting to compete with the prices at which the lowest class of furniture is sold, and which is fit for no useful purpose, their new stock will be found to be priced on the same principle by which their Bedding Trade has, during the last thirty years, been so successfully extended, and the goods, whether of a plain and simple pattern, or of a handsomer and more expensive character, are of well-seasoned materials, sound workmanship, and warranted.

HEAL and SON'S LIST of BEDDING, containing full particulars of Weights, Sizes, and Prices of every description of Bedding, sent free by post, on application to their Factory, 196 (opposite the chapel), Tottenham Court-road, London.

PASCAL'S PATENT FUMIVERE, and SELF-ACTING VENTILATOR.

The attention of the public is respectfully directed to this truly valuable invention. The scientific arrangement of this apparatus entirely obviates the inconvenience and annoyance of smoke chimneys, arising from any cause whatever. It is also adapted to all purposes of sanitary ventilation, particularly in places of public resort, schools, chapels, barracks, banks, large retail shops, hospitals, taverns, ships' cabins, and such other places, wherever gas is consumed or close shows are in use. The three values of Sizes, as shown in the section, are set in rapid motion by the centrifugal force of the heated air or smoke, causing a powerful exhaustion, or withdrawal of the smoke from the chimney, or the vitiated air generated in close rooms. It obviates the necessity of all chimney stacks or high tubes. In retail shops, where the goods displayed in the window are damaged from the impure vapours generated by the gas-burners, this ventilator will be found invaluable.—For further particulars apply to Mr. SEPTIMUS BRAITHWAITE, 169, Great Russell-street, Bloomsbury, where the apparatus is on view.

STANDING, FRANKLIN, & STANDING,
Sole Patentees and Manufacturers of the PATENT GLAZED STONE WARE SEWAGE PIPE. Offices, 23, Cornhill, entrance in Change-alley; Factory, Brunton's Wharf, Commercial-road, Limehouse.

By employing their patent machinery, S. F. and S. are enabled to produce a pipe for sewage and other purposes in every way far superior to those made by any other process, but more especially in these qualities so absolutely essential to a perfect, and cleanly mode of drainage. From the great and uniform amount of pressure, and peculiar construction of the machinery (allowing the air to escape), used in manufacturing, their pipes are entirely free from air bubbles, proving their greater strength, durability, and entirely preventing the contents percolating through; they are much smoother on the inside, insuring a perfect passage for the sewage, and preventing any deposit.

Specimens may be seen at the offices, 23, Cornhill, where prices, &c., may be obtained, and licences granted for the use of the patent machinery.

MEMEL TIMBER. 62s. 6d. per Load.—HERTHLET and CO. have still several hundred loads for sale, average length, 30 feet; 12 to 14 inches square. An inspection of the quality is earnestly requested.

Extensive mines of the best fire-clay being on the estate of this company, they are able to make sanitary tubes of greater strength and superior quality to any now in the market, and thereby enable of resisting much greater pressure.—Stores, Kingsland wharf, Adelphi, and No. 14, Buckingham, New road, near Hampstead road. Agent, HENRY ALLENBY, Office, No. 14, York-chambers, George-street, Adelphi.

SUPERIOR GLAZED STONEWARE DRAIN PIPES, invented and manufactured by
WILLIAM NORTHEN, UNION POTTERY, No. 14, VAUXHALL WALK, LAMBETH.

W. NORTHEN begs to inform surveyors, contractors, builders, water companies, &c., that he has completed "Superior" new patent machinery for making GLAZED STONEWARE DRAIN PIPES, JUNCTIONS, BENDS, ELBOWS, SYPHON-TRAPS, &c. &c. Amongst the many advantages of pipes made by this machinery over all others may be mentioned, that it insures perfect uniformity in form and size, both of pipes and sockets, the due fitting of a different and better construction than any others now in use; and the pipes and sockets being made by one process are secure from separation.

W. N. invites particular attention to the superior quality of the glaze used in his manufactory, which is equal to glass, and rendering it superior to the drains impervious. CLOSET PANS, with bowl and 3 feet traps, and improved inside white glaze.—W. NORTHEN'S PIPES MAY BE INSPECTED AT THE FOLLOWING PLACES, WHERE ORDERS ARE RECEIVED:
